Great Broad Walk Borders

Right plant, right place

When it comes to planting a garden, location is everything. Even a small garden can provide different conditions, and knowing where the sun shines and where it doesn't is the key to success.

The Great Broad Walk Borders stretch out 350 metres along the Broad Walk path. Conditions vary from one end to the other. Here at the southern end, surrounding trees create a shaded, cool environment compared to the northern end where it is sunnier and warmer.

The plants here are adapted to the low light levels created by the huge tulip trees (*Liriodendron tulipifera*) towering overhead. Some prefer the damp shade found in parts of this bed, while others can survive the dry shade found elsewhere. This illustrates that, regardless of conditions, there will be the right plant for each place.

The diagram to the right highlights a few of our favourite plants in this bed. For a full set of planting plans, look for *The Great Broad Walk Borders* booklet in our shop.

West Dean Gardens

West Sussex

- einer der größten restaurierten Gärten, die heute der Öffentlichkeit zugänglich sind
- Manor House aus 1622
- 1804 Umbau des Hauses und Erweiterung der Gärten
- 1891 Bau der Pergola und der Glashäuser
- Seit 1991 Neugestaltung der Gartenanlagen
- 50 ha Parklandschaft

A BRIEF HISTORY

There have been gardens here since 1622 when the original manor house was built by James Lewkenor. In 1804 when the current house, now home to West Dean College of Arts and Conservation was built, the gardens were enlarged and the kitchen garden was moved to its present position. William James purchased the estate in 1891 and made further improvements, including extending the glasshouses and constructing the pergola.

In 1912 Edward James inherited the estate. Best known for his patronage of artists including Dalí, Magritte, Tchelitchew, Fini and Carrington, in 1964 he established the Edward James Foundation, a charitable educational trust. West Dean College opened in 1971 and today offers short courses to Foundation, Diploma and Masters degrees in arts and conservation. Edward died in 1984 and is buried in St. Roche's Arboretum.

The transformation of the gardens began after the storms of 1987. From 1991, the 19th century landscape has been revitalised bringing the gardens international respect for the quality and variety of horticultural practice.
